Crestron iPad App Setup Guide

Apple ID Information		Wireless Information		Processor Information		SSL Information	
Apartment	Meon Hall - iPad05	SSID:	Meon Hall WiFi	IP Address	192.168.1.200	Username:	
Apple ID :	Owners Apple ID	Key:	89073391	IP ID:	1D	Password:	
Password :	Owners Apple ID						

Follow these steps to configure your mobile device for controlling your Crestron system.
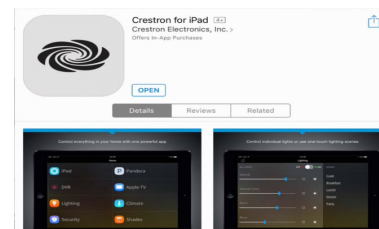

Prerequisite: Please make sure Wi-Fi is on and connecting correctly to your network. See Apple documentation for details (http://support.apple.com/kb/HT2031). At the top of this document is the information for your system. As the apartment does not have internet access or WiFi as base build you will need a network upgrade to be able to use your iPad with your system. Smartcomm can provide this service for you.

Step 1

Download the Crestron App (if using iPhone) or Crestron for iPad app (if using on a iPad) from the App Store
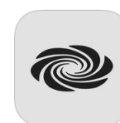

a) Open the app store from the IOS device

b) Press the Search at the top right of the screen and type Crestron and then press the search on the keyboard

Step 2

Start the Crestron Application by pressing the "Crestron" icon from the home page of your device.

Step 3

The app must be the upgraded version which you can complete the in app purchase by pressing the upgrade button.

If there is no upgrade button shown then the app is already the upgraded version.

Press the + icon in the bottom right to add in the details for your system.

Step 4

Enter all of the following information exactly as shown
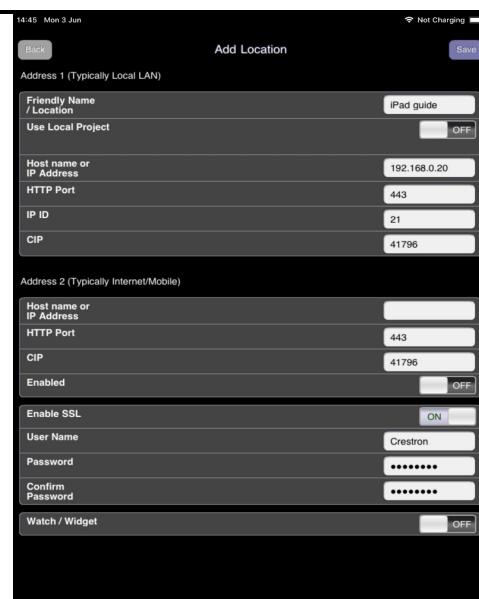

Address 1 (Typically Local LAN)

Friendly Name/Location:	Meon Hall - iPad05
Set "Use Local Project" to:	OFF
Host name or IP Address:	192.168.1.200
HTTP Port:	443
IP ID:	1D
CIP:	41794

Address 2 (Typically Internet/Mobile)

Host name or IP Address:	
HTTP Port:	443
CIP:	41794
Enabled:	OFF

Enable SSL:	OFF
Username:	0
Password:	0
Confirm Password:	0

Watch/Widget:	OFF

Step 5

Press Save button at the top right.

Step 6

Highlight the Name/Location of the entry that was just added from this setup which should be Meon Hall - iPad05

The iPad will now connect to the processor and download the file and you are now ready to use the system.
